

Electricity procurement planning

On the Elspot market of the Nord Pool exchange you trade in physical electricity distribution over the next day. The aim of Empower IM's electricity procurement planning service is to optimise your power balance in advance, while taking market price fluctuations into account. This way we help you minimise costs and get the best trading outcome.

- **PRODUCT GROUP:** Energy market services
- **SERVICE TYPE:** Daily service, 7 days a week
- **ASSOCIATED SERVICES:** Energy trading services and balance management services

Operating environment

The Nord Pool Elspot market is the world's largest "day-ahead" market for wholesale electricity trading. Offers for the various products on the market are made following closed auction principles so that information about other offers cannot be seen.

In order to succeed as an operator in the market you must have reliable estimates on which to base your procurement of electricity. The closed auction procedure requires a plan which produces an optimal result in every market situation.

Our service

Empower IM has extensive operating experience of preparing the plans required by market mechanisms on the Nordic energy market. When planning electricity procurement we compile your consumption and production estimates from various sources and then mirror these against market price estimates, resulting in purchases or sales on the Elspot market.

Our service also lets you respond to the current demand and adjust your production as a function of the market price. Electricity procurement planning is usually part of a larger service package and closely linked to balance management and trading services.

Why choose Empower IM?

We offer to help you plan your electricity procurement as your trustworthy partner, in your name and based on your principles. Our objective is to minimise your costs and optimise your outcome of spot trading, while using your individual production resources in the most profitable way, regardless of the hourly market price level.

When participating in the various electricity marketplaces Empower IM is purely a service provider acting on behalf of customers, never a trading partner. We are the only completely neutral player on the Nordic market.
